

Tuesday June 24

A composite image featuring Arnold Schwarzenegger and RoboCop. Arnold is in the foreground, wearing a pinstripe suit, holding a cigar, and taking a photo with a wooden iPhone case that has an elephant and the words 'A REPUBLIC' on it. RoboCop is standing behind him. The background is a Parisian cityscape with the Eiffel Tower visible in the distance.

CREATIVE INTELLIGENCE

WHO ARE YOU GUYS?

JUAN TUBERT
CTO, TOMBRAS

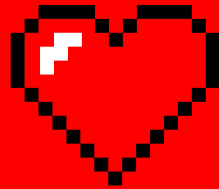

Juan joined Tombras in 2022 as its first Chief Technology Officer after 17 years at R/GA, where he led U.S. tech teams and helped build global practices across Argentina, San Francisco, and New York.

PAUL CAIOZZO
CCO, TOMBRAS

Paul launched the first AI-focused advertising agency in 2019, following a successful career at some of the world's most creative shops. He now leads creative at Tombras, named Agency of the Year out of 15,000 agencies in the USA.

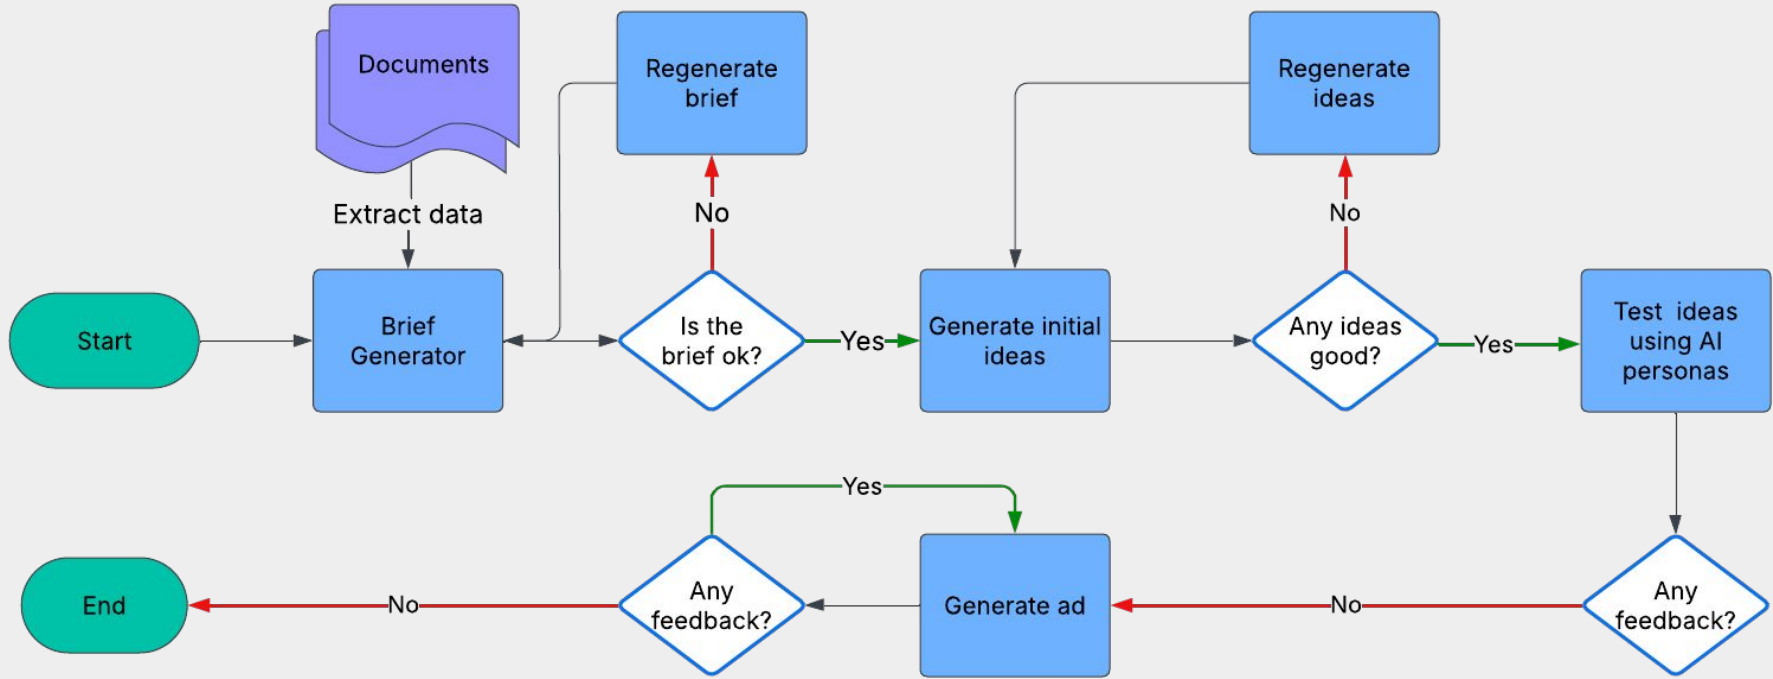

**"AI agents won't replace all marketers; they'll
replace the hours that keep the brilliant ones
from being brilliant."**

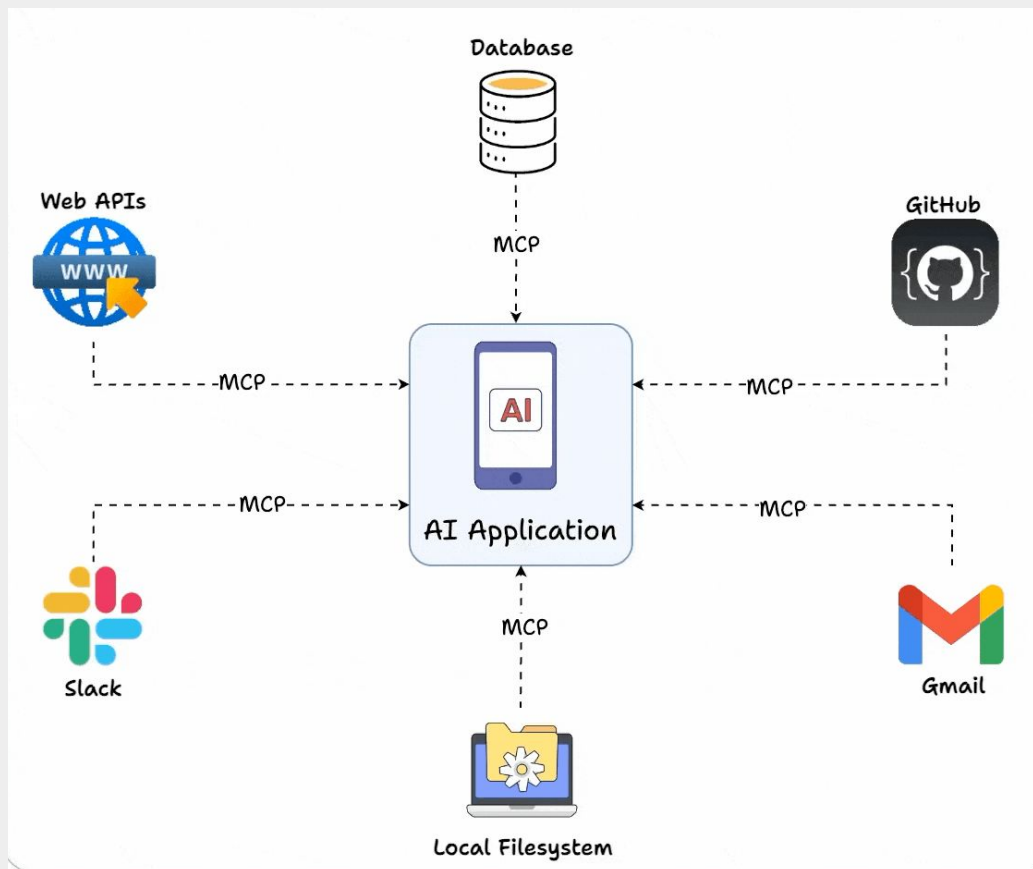

**We're going to
show you an AI led
creative process.**

**How does that
work, technically
speaking?**

Today's AI Process on a Page.

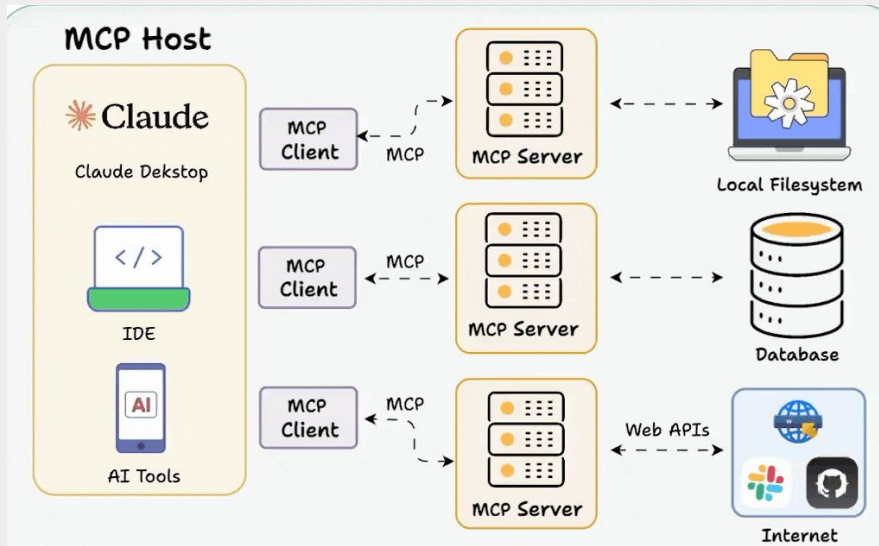

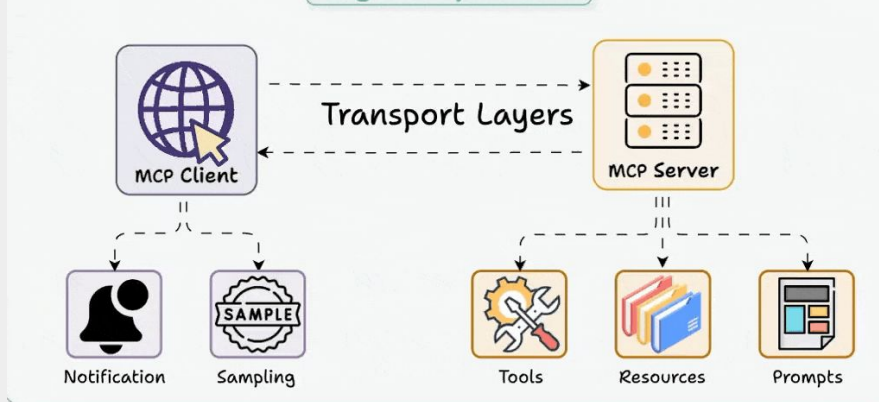

<https://blog.dailydoseofds.com/>

What is Model Context Protocol?

Is an open standard developed by Anthropic to standardize how AI models, particularly large language models (LLMs), connect with external tools, data sources, and environments

Key Components

Model Context Protocol Explained Further.

AI tools we are exploring and using for ideation.

AI Creative Process:

- 1. Strategy (Brief)**
- 2. Concept (Creative)**
- 3. Consumer Testing**
- 4. Execution**

**Wait, what are the
humans doing
then?**

**We're pushing the AI brief, the creative,
and the execution, adding our human
Insight, emotion and wisdom where it can't.**

We're pushing against these questions:

- 1. What's so interesting about Chosen Foods?**
- 2. What's so interesting about Chosen Foods right now?**
- 3. In a sentence or two:**

Sketching thoughts:

1. What's so interesting about Chosen Foods?

- (1) Chosen Foods does what it promises—100% pure avocado oil, no junk, no jargon, just real food that tastes incredible. **(No BS)**
- (2) Chosen Foods brings back the joy of eating by giving you food that's fun, clean, and damn good. **(Joy)**
- (3) Chosen's 100% pure avocado oil doesn't just taste better—it cooks cleaner, hotter, and smarter than the junk most people use. **(Performance)**
- (4) Chosen Foods is the superhero brand actually saving food—using 100% pure avocado oil to rescue it from junk, lies, and boring taste. **(Hero)**

Sketching thoughts:

2. What's so interesting about Chosen Foods Right Now?

- (1) At a time when people are burned out on health claims, and foods that claim to be real, Chosen is doubling down. Because they care deeply whether the audience is looking or not.
- (2) Right now, everyone's waking up to just how fake their "healthy" food really is
- (3) In a time when everything feels overpriced, Chosen actually earns its premium—pure ingredients, no filler, no regret.

Sketching Thoughts:

3. In a few words:

- | | | | |
|-----|---|-----|--|
| (1) | Get health-conscious eaters who believe most food brands can't be trusted to fall in love with food again by showing them a brand that actually means what it says. | (3) | Get skeptical shoppers who believe clean labels usually hide dirty secrets to trust Chosen by being radically transparent. |
| (2) | Get health-conscious consumers who are burned out on fake wellness claims and over processed "healthy" foods to trust, enjoy, and actually get excited about eating again by giving them a brand that's radically simple, honest, and powered by 100% pure avocado oil. | (4) | True food no matter what. |

Putting it all together, fast.

What's so interesting about Chosen Foods?

Chosen Foods does what it promises— 100% pure avocado oil, no junk, no jargon, just real food that tastes incredible.

What's so interesting about Chosen Foods right now?

At a time when people are burned out on health claims, and foods that claim to be real, Chosen is doubling down. Because they care deeply whether the audience is looking or not.

In a few words:

True food no matter what.

We're also using these filters to judge and build upon the AI concepts.

- 1. What's the most provocative and interesting statement we can make?**
- 2. How can we present that statement in a way people haven't seen before?**

Our Synthetic Focus Group

Anne

Female, 30+ home chef, cooking enthusiast, higher income.

Alex

Male, 25+ health and wellness enthusiast. Lives in an urban area, higher income.
